

SUPPORTING DAIRY FARMERS SINCE 1971

Quality products by the barrel

The complete Agrosolve dairy hygiene products guide

Contents

3-5 Introduction & Icons

6-9 Teat dips/biocides based on iodine

10-13 Teat dips/biocides based on chlorhexidine

14-15 Teat dips/biocides based on lactic acid

16-17 Detergents

18-19 Acid Cleaners

20-23 Alkaline Cleaners

24-25 Sanitisers, Disinfectants & Other Products

26-27 Other Services

Consistently superior products

At Agrosolve we are committed to the production of consistently high quality milk. We supply our customers with the best possible products and support these with superior service and advice.

We have over 50 years' experience in supplying the dairy industry and our acquired production and field support skills are second to none. We pride ourselves on our attention to detail and our flexible customer-focussed approach.

From our Wiltshire factory we supply nationwide through our trained dealer network. Our range of products and services support clean milk production, optimal udder health and provide the backup necessary in the event of unexpected problems.

Teat dips/biocides based on iodine

Ioklene RTU

Ready to use iodophor biocide

- 3000ppm iodine in use
- Rapid, broad spectrum biocide
- Clean, disinfects and moisturises
- Suitable for Pre, Post and Pre/Post Milking
- Suitable for use in Automatic dipping and flushing systems
- May be dipped, sprayed or foamed
- BPR Approved

Silkidip

Ready to use teat dip and spray

- Broad spectrum, powerful disinfectant
- High-level, high quality emollient blend
- Authorised veterinary medicine, marketing authorisation Vm 01808/5004
- For dairy cows, goats and sheep.
- Zero hour withdrawal period

Kote-It

Ready to use iodophor biocide

- 2500ppm iodine in use
- Rapid, broad spectrum biocide
- Thick low-drip for protection and maximum value
- High performance emollient complex
- BPR approved

PostGuard

Ready to use low drip Iodophor biocide

- 5000ppm iodine in use
- Rapid, broad spectrum biocide
- Thick low-drip for protection and maximum value
- High performance emollient complex
- BPR approved

Teat dips/biocides based on iodine

Ioklene Concentrate

Concentrated iodophor biocide

- 2800ppm iodine in use
- Rapid, broad spectrum activity
- Cleans, disinfects and moisturises
- Once diluted can be used in robotic milking systems
- BPR approved

Priodine Concentrate

Concentrated iodophor biocide

- 2800ppm iodine in use when diluted
- Broad spectrum activity
- Cleans, disinfects and moisturises
- Rapid efficacy
- 25L makes 200L RTU product
- BPR Approved

Clinidip L Concentrate

Concentrated iodophor teat dip and spray

- 5000ppm iodine in use
- Glycerine/lanolin emollient complex
- Authorised veterinary medicine. Marketing authorisation Vm 01808/5000
- For dairy cows, goats and sheep

Clinidip Super Concentrate

Concentrated iodophor teat dip and spray

- 5000ppm iodine in use
- Glycerine/lanolin emollient complex
- Authorised veterinary medicine. Marketing authorisation Vm 01808/5001
- For dairy cows, goats and sheep

Teat dips/biocides based on Chlorhexidine

Surespray

Unique ready to use chlorhexidine teat dip and spray

- 5000ppm chlorhexidine in use
- 8% emollient complex
- Rapid disinfection
- Moisturising properties
- Economic

Suredip

Ready to use Chlorhexidine Gluconate teat dip and spray

- 7400ppm Chlorhexidine Gluconate in use
- 11% emollient complex
- Authorised veterinary medicine, marketing authorisation Vm 01808/5005
- For dairy cows, goats and sheep

Suredip Concentrate

Concentrated chlorhexidine teat dip and spray

- 7400ppm chlorhexidine in use
- Superior level of active ingredient
- 7.5% emollient complex
- For dairy cows, goats and sheep

SureLy Concentrate

Concentrated Chlorhexidine Lactic acid post milking teat dip and spray

- Dual active biocide
- Kind and gentle on teats
- RTU tested to EN1656 & 1657
- Foam, dip or spray
- Green allowing increased visibility
- Reduced packaging - dilute 4:1
- Cost effective alternative to Iodine
- Long shelf life - 24 months

Teat dips/biocides based on Chlorhexidine

Prewipe

Biocidal wipes for food and udder preparation

- Chlorhexidine and lactic acid based providing a broad spectrum biocide
- Non tainting
- Alcohol free
- Safe to use on skin
- Bucket c/w 700 sheet roll
- Refill pack 3 x 700 sheets

Hexaklene R

Ready to use chlorhexidine based biocide with DEET

- 5000ppm chlorhexidine in use
- Broad spectrum biocide
- 12.5% emollient complex
- Repels flies for up to six hours
- Approved insect repellent

Clinipre Allways

Concentrated 9:1 foaming teat cleaner and conditioner

- 25L concentrate when diluted makes 200L litres ready to use
- Dip, spray or foam
- Non iodine
- Economic in use
- Mix with potable water

Blend Eze

Blend Eze is an electronic mixing unit that efficiently mixes Agroservice concentrated udder health hygiene products on demand.

Teat dips/biocides based on lactic acid

LactoSpray Duo

Ready to use pre and post milking teat dip based on enhanced Glycolic and Lactic acids

- High visibility - orange
- High emollient specification +12%
- Conditions and disinfects teats
- Ready to use
- For dairy cows, goats and sheep

LactoDip Duo

Ready to use post milking teat dip based on enhanced lactic acid

- Low drip formula
- High visibility - green
- High emollient specification +12%
- Conditions and disinfects
- Ready to use

Surespray Duo

Chlorhexidine and lactic acid teat dip and spray

- 3000ppm chlorhexidine in use
- 2% lactic acid
- Added 10% emollient
- Economic in use

Clinifoam

Ready to use pre milking foaming teat cleaner and conditioner

- Rapid acting
- Removes organic matter efficiently
- Gentle formulation that conditions the teat skin
- Biodegradable ingredients

Detergents

Cliniclean

- Use Cliniclean concentrated solution and one cloth per cow to prepare teats for milking. Manual preparation stimulates milk let-down.
- Gently cleans teats from organic matter
- Economic in use milk let-down

Cliniwash

Washing agent

- High performance
- Phosphate-reduced
- For washing re-usable udder cloths, highly soiled laundry and working clothes

Clinifresh

Washing up liquid

- For all manual cleaning
- Excellent cleaning performance
- Multi-purpose for dairy, farm and household
- Mild in use - neutral pH
- Perfume free

Blitze

Heavy duty detergent

- For use with high-pressure washers
- Use hot or cold with all water conditions
- Powerful soil remover and dispersant
- May be used for cleaning interiors of refrigerated vehicles

Acid cleaners

Acidsan

Liquid acid cleaner for circulation cleaning

- Contains nitric acid
- Added low-foam wetting agents
- Suitable for all water conditions
- Use hot or cold
- De-scaler

AcidKlene

Liquid acid cleaner and sanitiser for bulk milk tanks and milking systems

- Suitable for all water conditions
- Use hot or cold
- De-scaler
- Blended acids

Suppressor

Liquid acid cleaner for circulation cleaning

- Economic acid cleaner
- Low-foam wetting agents
- Suitable for all water conditions
- Use hot or cold as descaler

Cliniphos

Liquid acid for all dairy equipment

- High concentration acid
- Added low foam detergent
- Removes milkstone
- Blended acids

Alkaline cleaners

Alkasan

Liquid chlor-alkaline sanitiser for economical circulation cleaning

- Removes fats and milk proteins
- Broad spectrum disinfection
- Low foaming
- Suitable for all water conditions

Autoklene

Liquid chlor-alkaline sanitiser for circulation cleaning

- Removes fats and proteins
- Superior formulation
- Suitable for all water conditions

Chlorodex

Liquid alkaline cleaner and sanitiser for DX type milk bulk tanks

- High strength removes fats and proteins
- Broad spectrum disinfection
- Suitable for all water conditions

Alkadex Forte

Liquid alkaline cleaner

- Chlorine free
- Excellent emulsification of dairy fats
- High strength caustic solution
- Added low foam wetting agents
- Versatile - may be used for robotic milking systems.
- Use alternatively with Acidklene

Alkaline cleaners

Alkadex CF

Liquid alkaline cleaner

- Chlorine free
- Excellent emulsification
- Added low foam wetting agents
- Must be paired with a sanitising agent after milking
- Versatile - may be used in robotic milking systems

Filtasol

Liquid cleaner for filters and milking equipment

- Excellent surface wetting
- Use cold for economy
- Free rinsing
- Versatile immersion cleaner

Duosan 50

Alkaline concentrate powder for circulation cleaning

- High strength for optimum performance
- Available chlorine 5%
- De-fats
- Suitable for all water conditions
- Circulate in hot water

Sanitisers, Disinfectants & Other Products

Oxi-Acid

5% peracetic acid solution for cluster disinfection and final rinse

- Broad-spectrum disinfection
- Rapid action
- Added wetting agents

Clinibed 24/7

Bedding conditioner

- Minimises environmental mastitis causing bacteria
- Highly absorbent
- Reduces ammonia build-up
- Appropriate for all bedding types
- Anti-caking agent to prevent solidifying when damp
- Highly visible

Clinichlor

Liquid hypochlorite sanitiser for all dairy equipment

- 11% available chlorine (on dispatch)
- Broad spectrum disinfection
- Rapid action

Other services

Agrosolve offer further essential farm services to support precise parlour hygiene and optimal udder health

Bacteriology Troubleshooting

Rising Bactoscan levels can be caused by bacteria related to the milking parlour and plant hygiene. We can help pinpoint specific areas that could be causing high Bactoscan results, such as bulk tank cleaning, plant cleaning or contamination from cows from poor teat preparation or mastitis.

Water Testing

To help manage hygiene standards on farm we can check for bacterial contamination of water. This is relevant not just when private water, as well as mineral content and water quality. supplies are being used, but also for checking mains water at point of use. Testing focuses on testing for enterobacteria and faecal coliforms, the two key indicators of bacterial contamination in water supplies.

HyCheck Test Kit

The kit tests whether the alkalinity and chlorine levels in the stock solution, of a hot water wash, are at a level for effective cleaning. Different water qualities and contamination can affect the active alkalinity and chlorine levels which will affect how the milking machine is cleaned. With the results from the HyCheck we can alter the chemical to a different cleaner or play with the quantities of chemical to combat the water quality and quantity.

3M Bacteria Swab Testing

With hand held devices we can undertake rapid surface hygiene tests to check for protein residues, indicating inadequate cleaning, using simple “swab-click-read” technology for visual colour changes in under 10 minutes, helping ensure cleanliness and prevent cross-contamination.
